NeoBoard Standalone

Promote collaboration, regardless of time and location.

- > Create content synchronously
- > Intuitive design
 - > Clear structure based on slides
- > Private, secure and cross-platform -> SaaS and self-hosting
- > Works in sync with the NeoBoard inside Element

Ok! Let's give it a try!

Comin' up!

NeoDateFix

- > The center of the Nordeck Widget Suite
 - > Holding scheduled meetings in Element Messenger
- > Integrating all other widgets
 - > Hold a Jitsi video conference
 - > To carry out votes with NeoChoice
 - > To design boards with NeoBoard
 - > To navigate on the NeoMap

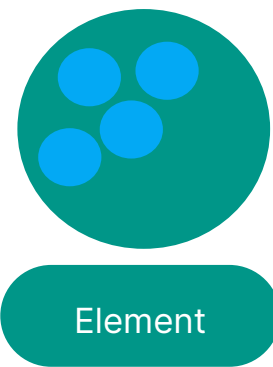

NeoChoice

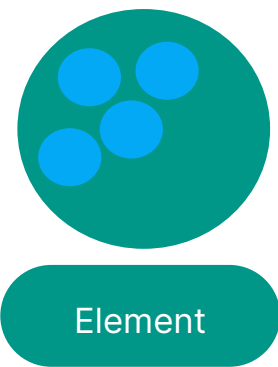

-> Conducting polls while videoconferencing

- > Easy to set and customizable votes
- > View voting results
- > Yes, no, abstention

Poll: Do you believe that decentralization is the answer to the problem of data security?

- > Host live discussions on various topics
 - > Submit and let participants suggest topics
 - > Pick a topic to work on with your team
 - > Set a time for the discussion

- > The map widget inside Element
- > See your live location
- > Set Points of Interest

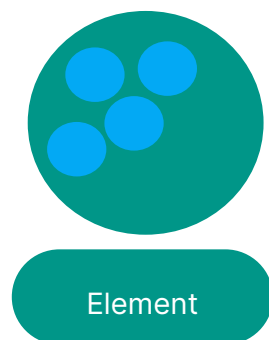

Q&A

@robert-pascal.gerbault-catalao:nordeck.io

#nordeck:nordeck.io

robert-pascal.gerbault-catalao@nordeck.net

<https://neoboard.io/>

Enhanced User Search

-> We have improved the user search in Element to support the following:

-> User attributes: roles, titles, location, ID.

-> Acronyms: DE, RG and so on.
Fuzzy search: wrong entries.

e-Healthcare Client

ar -> We have developed a matrix client for the healthcare sector.

-> The gematik specification requires the digital networking of players in the healthcare sector through a messaging system.

-> The aim is to simplify service provision and communication and make them more transparent: Doctors, nurses, pharmacists, and patients.

-> We have developed a messenger on behalf of a customer with another company.
